WORK EXPERIENCE

UX/UI Designer

DESIGNATION, Chicago 2016

18-week UX/UI bootcamp located in 1871's tech incubator. I studied the fundamentals of UX/UI design, interaction design, and front-end dev. I worked on several comprehensive projects, from research through UI deliverables, with actual clients under aggressive timelines. I designed mobile and web apps, while practicing agile methodologies in team settings.

Client: Windy City Labs - Domain research, prototyping, task flows, app mapping, and user testing for a new smart mirror technology called Glance.

Client: GiftOn - Domain research, prototyping, concept ideation, task flows, and user testing for a unique approach to digital gift-giving.

Employer Services Manager

Greenheart International, Chicago 2013-2016

A nonprofit organization that offers a wide range of international exchange programs for students. I managed the inbound Work and Travel program for short-term J1 visas under strict governmental regulation, that grew 20% during my time there. I managed over 100 employer accounts, that hired nearly 3,000 students across the country in a variety of industries, while facilitating overseas hiring events in 20 countries.

Marketing & Research Analyst

iConsortium, Tel Aviv, Israel 2012-2013

A green energy start-up that facilitates collaboration among various renewable energy technologies in Northern Israel. I worked on research, specifically for wind energy innovations, and created presentations for investor pitches. I also taught English at the nearby Math and Science School for the Gifted.

English Teacher

Sunflower Montessori, Korea 2009-2012

A private Montessori kindergarten in Korea's 3rd largest city of Daegu. I taught advanced children aged 4-6 in a foreign environment through language immersion. I structured lesson plans, after school programs, and developed course curriculums. I was also an active member of a language-exchange program with local Korean university literature students.
